**LYNN’S LEGACY CENIZO**
*Leucophyllum langmaniae*

- **Plant Type:** Shrub
- **Mature Height:** 5’
- **Plant Spread:** 5’
- **Flower Color:** Purple/Lavender
- **Bloom Time:** Spring to Fall
- **Character:** Evergreen
- **Light Requirement:** Full Sun
- **Water Requirement:** Low
  
  **Description:** This evergreen gray-leaved shrub is known for its large lilac-colored blooms that are reliably long-blooming after a heavy rain. A favorite of butterflies, hummingbirds and bees.
  
  **Larval Host:** Theona Checkerspot, Callieta silkmoth

**FLAME Acanthus**
*Anisacanthus quadrifidus*

- **Plant Type:** Perennial
- **Mature Height:** 3’
- **Plant Spread:** 3’
- **Flower Color:** Orange, Red
- **Bloom Time:** Spring to Fall
- **Character:** Deciduous
- **Light Requirement:** Full Sun to Part Sun
- **Water Requirement:** Low
  
  **Description:** Also known as hummingbird bush, this Texas native perennial planted for showy red and orange long-blooming flowers which also attract butterflies. It’s very easy to grow and has a tendency to flourish beyond its boundaries.
  
  **Larval Host:** Janais Patch, Texan CrescentSpot

**RED TURK’S CAP**
*Malvaviscus arboreus*

- **Plant Type:** Perennial
- **Mature Height:** 4’
- **Plant Spread:** 3’
- **Flower Color:** Red
- **Bloom Time:** Spring to Fall
- **Character:** Deciduous
- **Light Requirement:** Full Sun, Part Sun, Part Shade, Full Shade
- **Water Requirement:** Low to Medium
  
  **Description:** This easy to grow Texas native shrubby perennial produces flushes of red blooms in sun or shade, that attract hummingbirds and butterflies alike.
  It’s so easy to grow it’s often self-spread but is can be readily maintained by pruning back once or twice a year.

**GREGGS MISTFLOWER**
*Conoclinium greggii*

- **Plant Type:** Perennial
- **Mature Height:** 2’
- **Plant Spread:** 2’
- **Flower Color:** Blue
- **Bloom Time:** Spring, Summer, Fall
- **Character:** Perennial
- **Light Requirement:** Full Sun, Part Sun, Part Shade
- **Water Requirement:** Low
  
  **Description:** One of the favorite stops for the migrating monarch butterflies, as well as many other species of butterflies, bees and native pollinators. It’s dense power blue flowers are very easy to grow and have a tendency to spread forming a tall groundcover.

**TEXAS LANTANA**
*Lantana urticoides*

- **Plant Type:** Perennial
- **Mature Height:** 4’
- **Plant Spread:** 4’
- **Flower Color:** Red, Orange, Yellow
- **Bloom Time:** Spring to Fall
- **Character:** Perennial
- **Light Requirement:** Full Sun
- **Water Requirement:** Low
  
  **Description:** This Texas native lantana produces clusters of showy red, orange and yellow flowers that hummingbirds, butterflies and bees love. Plus, they are extremely heat and drought tolerant, happily blooming throughout the summer.

**TEXAS ROCK ROSE**
*Pavonia lasiopetala*

- **Plant Type:** Shrub
- **Mature Height:** 3’
- **Plant Spread:** 3’
- **Flower Color:** Pink
- **Bloom Time:** Spring, Summer, Fall
- **Character:** Deciduous
- **Light Requirement:** Full Sun, Part Sun, Part Shade
- **Water Requirement:** Low
  
  **Description:** A extremely heat and drought tolerant native shrubby perennial that produces dense, miniature pink-colored hibiscus-like flowers feeding bees, butterflies, and other beneficial insects from spring through fall.

**MONARDA ‘JACOB CLINE’**
*Monarda didyma ‘Jacob Cline’*

- **Plant Type:** Perennial
- **Mature Height:** 3’
- **Plant Spread:** 2’
- **Flower Color:** Scarlett Red
- **Bloom Time:** Summer, Fall
- **Character:** Deciduous
- **Light Requirement:** Full Sun, Part Sun, Part Shade
- **Water Requirement:** Low to Medium
  
  **Description:** The vibrant red crown-shaped flowers of this monarda are a favorite of hummingbirds, bees and butterflies summer through fall. ‘Jacob Cline’ is a North American variety that was found growing wild and is cultivated for its exceptionally large and showy flowers.

**‘GOLDSTORM’ RUDBECKIA**
*Rudbeckia fulgida var. sullivantii ‘Goldsturm’*

- **Plant Type:** Perennial
- **Mature Height:** 3’
- **Plant Spread:** 3’
- **Flower Color:** Yellow
- **Bloom Time:** Summer to Fall
- **Character:** Deciduous
- **Light Requirement:** Full Sun, Partial Shade
- **Water Requirement:** Low
  
  **Description:** ‘Goldsturm’ is a more compact version of this North American native perennial that produces large yellow cone-like flowers with dark brown centers. In addition to providing nectar for many butterfly species, this rudbeckia offers special value to native bees.

**‘HENRY DUELB’ERG’ SALVIA**
*Salvia farinacea ‘Henry Duelberg’*

- **Plant Type:** Perennial
- **Mature Height:** 3’
- **Plant Spread:** 3’
- **Flower Color:** Blue
- **Bloom Time:** Spring to Fall
- **Character:** Semi-evergreen
- **Light Requirement:** Full Sun, Partial Shade
- **Water Requirement:** Low
  
  **Description:** A reliable drought tolerant native perennial that attracts pollinators by producing upright spikes of striking dark blue flowers that bloom spring to fall. It is of important value to native bumblebee species.
10 ZEXMENIA
*Wedelia acapulcensis var. hispida*

- **Plant Type:** Perennial
- **Mature Height:** 2’
- **Plant Spread:** 2’
- **Flower Color:** Yellow
- **Bloom Time:** Spring to Fall
- **Character:** Semi-evergreen
- **Light Requirement:** Full Sun, Partial Shade, Full Shade
- **Water Requirement:** Low
- **Description:** A native perennial planted for a dense canopy of showy yellow flowers, so easy to grow it is referred to as a “miracle plant” because of its versatility, cold and drought tolerance and long booming period.
- **Larval Host:** Bordered Patch

11 **‘APRICOT SUNRISE’ AGASTACHE**
*Agastache ‘apricot sunrise’*

- **Plant Type:** Perennial
- **Mature Height:** 3’
- **Plant Spread:** 3’
- **Flower Color:** Pale golden-orange
- **Bloom Time:** Summer to Fall
- **Character:** Perennial
- **Light Requirement:** Full Sun, Partial Shade
- **Water Requirement:** Low
- **Description:** The tubular apricot colored flowers bloom non-stop from summer through early fall attracting an array of hummingbirds, butterflies and bees. ‘Apricot Sunrise’ is a cross between two agastache native to the southwestern U. S.

12 BUTTERFLYWEED
*Asclepias tuberosa*

- **Plant Type:** Perennial
- **Mature Height:** 2.5’
- **Plant Spread:** 1.5’
- **Flower Color:** Yellow/Orange
- **Bloom Time:** Summer
- **Character:** Deciduous
- **Light Requirement:** Full Sun
- **Water Requirement:** Low
- **Description:** Butterflyweed is one of the most ornamental and easy to grow Texas native milkweeds. Flowers are a high value nectar source for many butterflies, bees and hummingbirds. Leaves are also a food source for monarch and queen butterfly larvae.
- **Larval Host:** Monarch, Queens, Grey Hairstreak

13 **‘MOONBEAM’ COREOPSIS**
*Coreopsis verticillata ‘Moon beam’*

- **Plant Type:** Perennial
- **Mature Height:** 2’
- **Plant Spread:** 2’
- **Flower Color:** Yellow/Orange
- **Bloom Time:** Spring to Summer
- **Character:** Semi-evergreen
- **Light Requirement:** Full Sun
- **Water Requirement:** Low
- **Description:** Yellow daisy-like flowers with yellow centers are long blooming, rising above slender threaded leaves. ‘Moonbeam’ is a compact cultivar of a North American native and is a favorite of gardeners and attracts a number of specialist pollinators.

14 **CEDAR SAGE**
*Salvia roemeriana*

- **Plant Type:** Perennial
- **Mature Height:** 3’
- **Plant Spread:** 1’
- **Flower Color:** Red
- **Bloom Time:** Spring to Summer
- **Character:** Deciduous
- **Light Requirement:** Full Sun to Partial Shade
- **Water Requirement:** Low
- **Description:** A tough Texas native, cedar sage has beautiful heart-shaped hairy leaves which give rise to long blooming tubular red flowers through summer. They are great at attracting butterflies and hummingbirds.
